Work Experience

IT Manager March 2023 until now (3 years and 3 months)
 Hoshmand sazan Iran Tehran
 Achievements

Designed and implemented reliable IT infrastructure, improving system stability and reducing downtime.
 Optimized IT processes and reduced operational costs through automation and modern technology solutions.
 Strengthened organizational cybersecurity by implementing security policies, firewalls, and monitoring systems.
 Implemented and integrated enterprise software systems to improve operational efficiency.
 Improved IT service response time and increased internal user satisfaction.
 Successfully managed IT projects and delivered them within scope, time, and budget.
 Led and developed the IT team while fostering a culture of continuous learning and improvement.

Key Responsibilities

Plan, design, and manage IT infrastructure including networks, servers, data centers, and cloud services.
 Ensure information security, manage access control, and mitigate cybersecurity threats.
 Maintain enterprise applications, databases, and organizational IT services.
 Provide technical support and ensure stable operation of all IT systems.
 Lead digital transformation initiatives within the organization.
 Manage IT procurement, vendor relationships, and technical contracts.
 Prepare performance reports and provide strategic recommendations to senior management.
 Establish and enforce IT policies, standards, and best practices.

IT Manager February 2019 until January 2024 (4 years and 11 months)
 Mellat insurance Iran Hamedan

Key Achievement at Mellat Insurance Supervision Office – Hamedan Province

Designed and implemented a comprehensive management panel enabling full oversight and control of all insurance-related operations across Hamedan Province. The system delivered:
 Full integration of issuing, claims, financial, and reporting processes
 Significant reduction in processing time and operational errors
 Improved transparency through real-time dashboards and analytical reports
 Enhanced monitoring of branches and brokers
 Automation of critical workflows, increasing efficiency and accuracy
 This project directly contributed to improved organizational agility and higher operational productivity within the provincial insurance operations

Web developer April 2016 until October 2018 (2 years and 6 months)
 AmiranMatrahShahr Iran Hamedan

Taught Android Application Programming at Hamedan University of Technology	2016
Provided Raspberry Pi Training to Microprocessor Course Students at Hamedan University of Technology	2017

About Me

I am a software developer specializing in Android development, artificial intelligence, robotics, and backend engineering. I have hands-on experience with Kotlin, Laravel, Unreal Engine, and embedded systems, and I have achieved top ranks in multiple programming marathons. I have teaching experience at Bu-Ali Sina University and Hamedan University of Technology and have worked on both academic and industrial projects. My interests include robot path planning, deep learning, and mobile application development.
